ABOUT US

Prior Power Solutions provides extensive engine and equipment repair and maintenance services.

Covering a wide range of markets and applications we are an authorised dealer for all major engine and equipment manufacturers, stocking and supplying a wide range of parts and engines.

From our extensive base in Great Yarmouth, Norfolk we are helping our customers adopt the latest in clean energy technology through the supply of Stage V diesel, alternative and sustainable power systems, equipment, and services.

Supporting a wide range of industries, we also have an international reputation for high quality design and manufacture of a wide range of hazardous area equipment, particularly well service equipment.

Established in 1980, we offer 24/7 support to our customers worldwide.

**3 WORKSHOPS ACROSS
SINGLE 2,800SQM SITE**

**ENGINE TEST BAY CAPABLE
TESTING TO 2,000BHP**

**GENUINE PARTS FROM
AUTHORISED DEALER**

**SUPPORTING A LOW
CARBON FUTURE**

PARTS & ENGINES

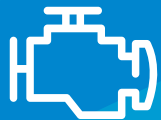

We stock an extensive range of genuine engine parts and accessories for all major manufacturers.

In addition to new parts supply, we also stock remanufactured and service exchange equipment, including cylinder heads, turbochargers, crankshafts, coolers and air starter motors. Alongside this, our team is remarkable at sourcing obsolete or hard to obtain parts.

With our broad dealer status, we can deliver a wide range of new and reconditioned diesel, gas, and alternative-powered engines suitable for a wide scope of markets and applications.

Modern, emission-compliant engines can be packaged with choice of diesel-driven equipment including generator sets, fire pump sets, hydraulic powerpacks and more.

We also provide air compressors, catering for all applications and sizes from 0.2 to 1,000hp and up to 1,800cfm - specialising in lubricated rotary screw air compressors.

MODERN EMISSION-COMPLIANT ENGINES

FAST, INTERNATIONAL DELIVERY

GENUINE PARTS FROM AUTHORISED DEALER

REMANUFACTURED ENGINES & COMPONENTS

OFFSHORE SERVICES

To complement our portfolio of engine and equipment services, we provide franchise-trained, multi-disciplined and experienced offshore technicians worldwide.

Covering a multitude of equipment such as engines, compressors, liquid nitrogen converters, coil tubing units, hydraulic power packs and pumps (including ATEX, Rig-Safe and safe area applications), Prior Power Solutions has a wealth of experience having undertaken a vast array of work scopes in this field for four decades.

With unparalleled resources and support, we offer 24/7 maintenance, repairs, overhauls, health checks, diagnostics, surveys, testing and more – globally.

Short-term, long-term, back-to-back, and extensive contractual agreements can be fully covered and supported.

We pride ourselves on the ability to provide high quality customer service with the correct solutions to meet individual project requirements and deadlines.

MARINE SERVICES

In addition to our engine and equipment repair and maintenance services, our marine department provides complete mechanical, fabrication, and pipework services for a wide range of vessel types.

Our core services include voyage repairs, system upgrades and modifications, sea fastening works, special surveys, and damage repairs as well as winterisation and dewinterisation work packages.

Supported by our knowledgeable and well-stocked parts department, our certified marine technicians also undertake engine, propulsion/ auxiliary generator set and compressor maintenance services as well as refrigeration repairs and fender replacement/supply.

With a comprehensive understanding of the 24-hour marine environment and vessel movements, all our services are provided with a focus on efficiency, ensuring minimal downtime.

Boat building and conversions are part of our heritage, and we offer unparalleled resources and support across the UK and globally.

APPLICATIONS:

- CTVs
- Yachts
- Leisure craft
- Lifeboats
- Fishing boats
- Sea fastenings
- Commercial vessels
- Bridges
