

Planned preventative and breakdown **Outage Services**

We understand the time and cost-critical nature of outages, and we understand the importance of a safety-conscious, reliable resource – a team who is qualified and hard-working.

Providing multi-disciplined support for planned or emergency outages at power stations, offshore installations, chemical plants, processing sites, and industrial sites nationwide our team's experience allows us to work unsupervised whilst providing a high standard of work and adherence to site health, safety, environmental and wellbeing regulations.

Drawing on experience from a wide range of projects from gas power stations and gas terminals to offshore installations, we provide a broad scope of mechanical, electrical, fabrication and pipefitting services.

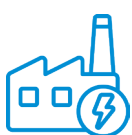

Work with us for our reliability

Drawing on a pool of over 40 employed skilled engineers, our employees care about the job in hand and provide flexibility to work beyond the time scope if works are delayed or extended.

Why choose us?

- ✓ High standards of safety, quality, and training
- ✓ Multi-disciplined, agile team able to adapt and problem-solve on the job
- ✓ Excellent relationship built between our team and customer maintenance teams becoming seamless integrated resource

Outage Services

Partnering with you to achieve your objectives

Our flexibility means we work with you to suit your needs.

We perform to your requirements, your timescales, your budgets, and your quality, health, safety and environmental standards.

Our engineers work efficiently and are problem-solvers. They are hardworking and conscientious – often making contributions to projects that extend far beyond the scope of work.

Engineers qualified for rigging/slinging, are forklift and gantry crane competent, have small bore tubing and compression fitting qualifications and bolt torquing certifications make up our core team. All our engineers are competent using workshop machinery. We also have qualified first aiders in our team with some also having confined space, working at heights and fire safety training.

Tasks unable to be completed onsite can be carried out at our modern, fully equipped workshop and our team is fully backed by dedicated office support to manage every step of the process effortlessly.

Workscopes covered:

- ✓ General maintenance
- ✓ Mechanical labour support
- ✓ Component removal, repair, and overhaul
- ✓ Pump and motor coupling alignment
- ✓ Hydraulic torque tightening
- ✓ Cleaning/jetting of heat exchangers etc
- ✓ Pipefitting
- ✓ Fabrication services completed in-house
- ✓ Machining services completed in-house
- ✓ Supply of consumables

“The team has been fantastic, integrating into our Maintenance Team well, as well as bringing additional machining skills. Working on all areas of the plant they have the right mix of skills and behaviours to complete the job.

Their safety performance has been great (no accidents or incidents), they have adopted our safety culture and ensured that they adhered to our safety rules. We would be very happy to see this group back in the future”.
