

Rental Solutions

180k Zone 2 Nitrogen Pump

Non-CE Marked

This globally recognised 180k nitrogen pump from Prior Power Solutions is designed and manufactured to a high standard with ease of operation and ongoing maintenance at the core.

Our nitrogen pumping unit can also be operated at 15,000 psi working pressure by utilising a simple conversion kit, giving greater flexibility on operational parameters.

Design features

Area classification	Zone 2
Design	DNV 2.7-1 Offshore certified skid
Maximum flow rate	180,000 SCFH
Maximum working pressure	10,000 psi or 15,000 psi
GN2 Discharge temperature	c21°C

Reliable Equipment

24/7 Support

Easy Operation

180k Zone 2 Nitrogen Pump

Non-CE Marked

Technical Specification

Engine specification

Make/model	Caterpillar 3406
Rated power	490 BHP @ 2,100 rpm
Diesel tank capacity	540 litres
Starting method	Air start

Pump specification

Make/model	ICPE 200
Max input pressure	240 HP
Cold end	1.625"
Maximum working pressure	10,000 psi
Maximum flow	3,000 SCFM

Unit dimensions/weight

Length	4,500 mm
Width	2,438 mm
Height	2,590 mm
Weight	10,000 kg

Safety features

- Engine overspeed
- High exhaust gas temperature
- High engine coolant temperature
- Low engine lube oil pressure
- Low hydraulic oil level
- Spark arrestor silencer
- Emergency stop button

Applications for use

- Purging
- Well fracturing
- Nitrified fluid injection
- Coiled tubing
- Well bore cleanouts
- Nitrified fluids
- Nitrogen perforation
- Pipeline and process applications

Options

- 15,000 psi conversion kit
- Comprehensive OEM-training
- Temperature shutdown skid
- Over pressurisation skid
- Critical maintenance pack
- Data acquisition system
- Operator canopy
