

Nationwide from Great Yarmouth and Grimsby

Offshore Wind Services

For over 40 years we have supported commercial marine customers in the North Sea and globally.

From crew transfer vessels and service operation vessels to offshore support vessels and jack up lift barges – we cover them all.

Engines, generators and drivelines

Come to us for any engine maintenance, repair or overhaul requirement whether that is for main propulsion or auxiliary set. We cover all engine brands and also support backup generators in offshore substations.

Ship repairs

We provide a wide range of repairs including general machinery repairs, electrical, mechanical and hydraulic engineering works, pipefitting and structural steel work.

Why choose us?

- ✓ Multi-brand trained engineers
- ✓ GWO-Certified team
- ✓ 24/7 Call out
- ✓ Fully equipped workshop and genuine parts held in stock

Brands covered include

**V O L V O
P E N T A**

What our customers say

“The engineers always take great pride in doing a good job and keep in constant contact, providing assistance beyond what can be expected. It does not matter if it is early morning or late night, safety is a priority, challenges are always overcome, and the site always left clean and in good order.”

Offshore wind vessel operator
Service customer

“Notoriously in our sector, working on impulse is unavoidable and we rely on rapid, knowledgeable and accurate responses from our suppliers. Quotes and shipments are met promptly, and you have always risen to the challenges of obscure locations, fulfilled all our requests, and gone above and beyond.”
